Projects

CGI – Hijat 2 (01/2020 - 09/2020)

Technologies: Java, Spring, Angular, Rest

Project with 5 years when I started, with the purpose of developing a tool to manage salaries in Finland. The Frontend was developed in Angular and the Backend in Java and Spring using a microservices architecture.

CGI – RPA in CGD (11/2020 - 02/2021)

Technologies: UiPath

Development and maintenance of RPA robots in UiPath, as well as analysis of their performance.

CGI – Projeto Jacob (05/2021 – Presente)

Technologies: Alfresco, Groovy, Docker, Rest

Development of pension management software in Holland. The principle of this software was the storage of facts and subsequent calculation. I played the role of workflow developer at Alfresco for the first 4 months and since 09/21 I have been developing web-services and extracts.
